

Black Rose Wars – unofficial quick reference by TORN - v2c

GAME TURN

Black Rose Phase

Study Phase

Preparation Phase

Action Phase

Evocation Phase

Clean-up Phase

Repeat action rounds until all players have passed!

In player order players **must** consume 1 or 2 available actions out of:

Take Physical Action

Cast next Standard Spell (max 1/round)

Cast Quick Spell

One of those actions can **optionally** be:

Discard an **unused** spell to move 1

Pass if no **mandatory** action left!

1. Black Rose Phase

1. The player holding the crown becomes the **first player** for this game turn (clockwise player order starting with her/him).
2. Players may **discard Active Quests**, which **awards power points (pp)** to Black Rose (1-3, as per Quest level).
3. Discard Event on the 3rd position of the Event Track, **shift** remaining events one position to the right.
4. Last player **draws Event** (gets crown if there is a crown symbol showing on the Event card):
 - a. If **Instant Event**, the last player reveals, resolves and discards it immediately;
 - b. If **Action or Black Rose Event**, the last player reveals it and places it on the Event Track (at the position indicated on the card!), shifting Events to the right (if necessary);
 - c. **Resolve Black Rose Events** on Event Track from left to right;
 - d. Whenever an Event is revealed or discarded during this phase, **award power points (pp)** to the Black Rose (see bottom left/right of Event)
5. **Players without Active Quest** draw a Quest of the current Moon.

2. Study Phase

1. Players **draw 2 cards from their Grimoire** to their hand; if Grimoire is empty, shuffle Memories to form a new Grimoire.
2. In player order each player **draws 4 cards** from any combination of School Decks (except the Forbidden School), looks at them, **adds 2 to their hand and discards the remaining** to the Library (face up to respective School's Discard Pile).
 - Players may discard a single card from their hand **to the Library** any time during this phase. Custom Spells go to the side instead.
 - For **empty School Deck**, reshuffle its Discard Pile to form a new deck!
 - Discard hand cards to the Memory if the hand size exceeds the maximum for this mage.

End Scoring

1. The Black Rose does not take part in nor can it benefit from any bonus scoring at the end of the game!
2. **Most completed Quests**: +6pp (+5pp if tied), second +3pp (+2pp if tied), any other player with at least 1 Quest +1pp.
3. **Most Trophy Tokens**: +4pp (+3pp if tied), second +2pp (+1pp if tied), any other player with at least 1 token +1pp.
4. **Score Room Activation Tokens**.
5. **Player holding the crown** +1pp.
6. **Most pp wins!** Greater number of Quests, followed by Trophy Tokens break tie; still tied: player with crown selects winner.

3. Preparation Phase

1. Players must play 1 spell from their hand face down to their Mage Sheet as a **Quick Spell**.
 2. Players must play 1 to 3 spells from their hand face down to their Mage Sheet as **Standard Spells 1 to 3**.
- Any spell you play from your hand during subsequent phases is placed in one of the 4 spell slots, eventually replacing a spell.

4. Action Phase

1. **Resolve Action Events** on the Event Track from left to right!
2. In player order **players repeatedly take 1 or 2 actions**, or (if no mandatory action available) **pass** until all players have passed.
 - Always cast **Standard Spells in order** – from 1 to 3!
 - Attacks/spells without a valid target still occur but without any effect.
 - When **in their cell**, mages **MUST** use their next action to move out of their cell (discard of **activated** spell to move is optional)!
 - **Activated Trap or Protection Spells** remain active until triggered or removed from the Mage Sheet – even after passing!
 - When in doubt, **Triggers** (Quests, Traps, Protection) are resolved clockwise, starting with the player next to the triggering player.

5. Evocation Phase

1. In player order players **activate all their Evocations once**.
2. An activated Evocation may **move and may then fight**.

6. Clean-up Phase

1. **Return still activated Traps** to the respective player's hands!
2. **Remove used Forgotten Spells from the game**.
3. **Discard all other spells** from the Mage Sheet to Memories!
4. **Flip both Action Tokens** (Physical Actions) to active side!
5. **Flip all Room Activation Tokens** to active side!
6. **Room instability**: If all slots of a room are occupied by Instability Tokens (cubes), the player with the most cubes gets the Room Activation Token (Black Rose if tied). Cubes are returned to Reserve; the room is flipped to destroyed side.
7. If any player or the Black Rose has reached **30 power points**, **the game ends**. Otherwise, start a new game turn.

Other

- **Spell types**: ⚔ Combat ● Contingency ♥ Protection ⊖ Trap
- ♥ Protection and ⊖ Trap Spells are activated when cast as Spell Action; put a marker on them. Certain game events can trigger activated spells. If the player wishes the triggered spell is revealed and resolved.
- **Targets**: 🧑 Oneself 👤 Mage or Evocation but not oneself ◇ Room ★ Special – a number indicating a range (straight line of sight), a * indicating any range (no straight line required).
- **Spells with ☉**: When revealed, place Instability Token (cube) in room.
- **Physical Action**: Either move your mage up to movement-limit rooms or fight. A mage may activate its room before or afterwards.
- **Defeat mage**: Final blow gets Trophy Token. All damage dealt +5pp, most damage dealt +4pp (+3pp if tied), second most +2pp (+1pp if tied), at least 1 damage dealt +1pp – return defeated mage to cell. Don't get points for your own defeat!
- **Your spells/effects CANNOT damage your own miniatures!**
- When 6pp/18pp are reached switch to Half/Full Moon, replace Quest and Event Decks and draw a card from your Custom Spells.
- You may have no more than a maximum of 2 Active Quests!
- Without cubes left, you cannot deal damage or cause instability.
